

Cecilia AI

Embrace technology to maintain your competitive edge

Empower your attorneys with generative AI to provide more value and better outcomes

Today's legal teams must foster a culture of innovation to stay ahead of the curve and evolve their services to confront:

- Exploding data volumes
- Expanding scope of work
- Challenging deadlines
- Increasing demands for high-quality work at a lower cost

“ Cecilia Q&A gave me a very clear, concise answer on a newly raised issue and identified key supporting documents. I was able to figure out in five minutes what was happening, why it was important, and make a decision based on it.

— Kristopher Wood, Senior Associate, Orrick, Herrington & Sutcliffe LLP

CECILIA Q&A

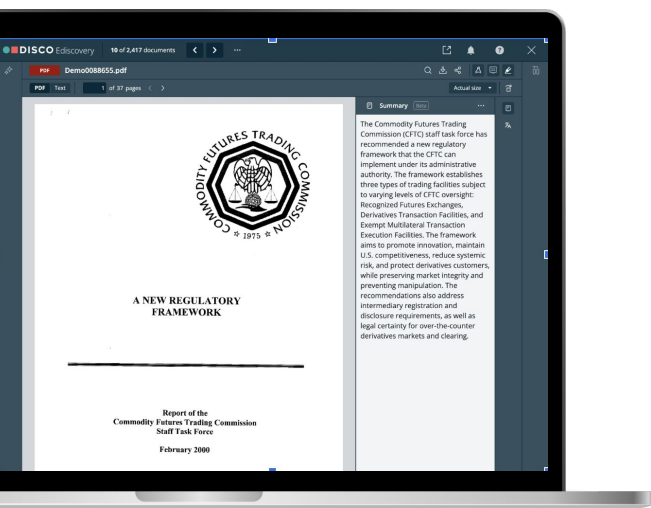

INTERROGATE YOUR EVIDENCE

- Ask questions in conversational language and receive an answer crafted only from the evidence in your DISCO Ediscovery database
- View the cited documents and the specific, highlighted passages that were used to generate the answer
- Scope Cecilia Q&A to a subset of your documents to control the information Cecilia Q&A considers when answering questions
- Stop constructing complex search queries and combing through hundreds of documents — instead, ask questions directly and get answers in seconds.

CECILIA Q&A (SINGLE-DOC)

DIG DEEP INTO INDIVIDUAL DOCUMENTS

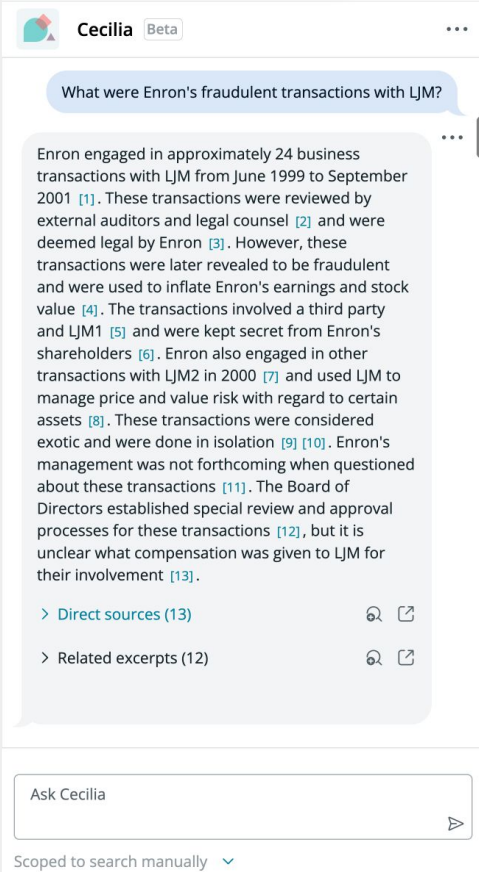

- Use conversational language to interrogate an individual document within your DISCO Ediscovery database
- Ask questions specific to issues on your case to clarify concepts, QC tagging decisions, and more
- Receive answers in relevant formats, like a list of defined entities or a summary in the form of a timeline
- Use with Cecilia Q&A and doc summaries to supercharge your review workflow

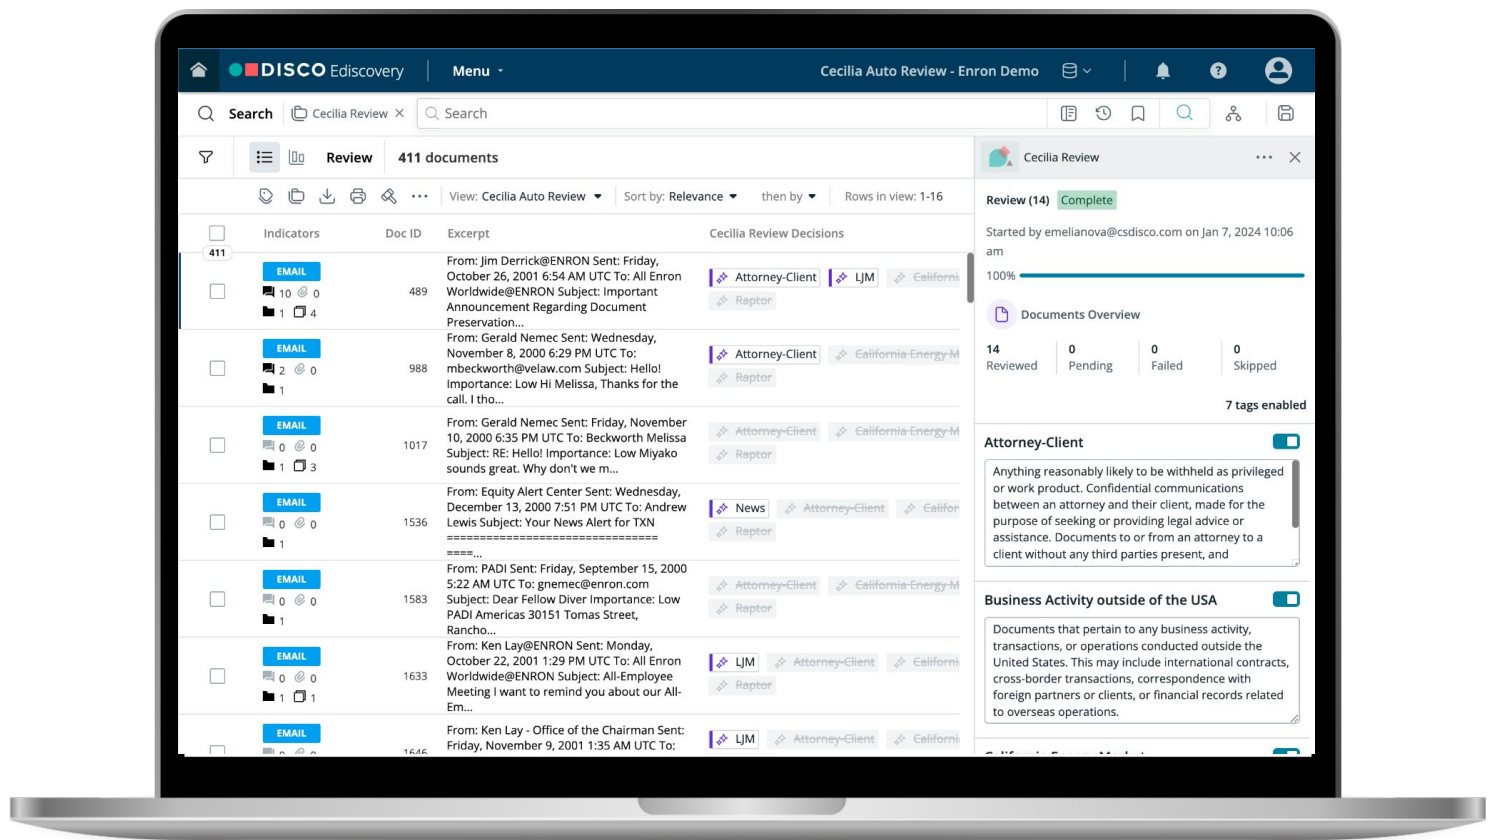

CECILIA DOC SUMMARIES

SUMMARIZE ANY DOCUMENT WITH A SINGLE CLICK

- Get an on-demand recap of any document directly within the document viewer
- Improve your review with succinct, plain-English summaries of contracts, reports, or even foreign language documents
- Summarize important documents before sharing hot doc binders with your team
- Quickly grasp key documents identified by Cecilia Q&A to speed your understanding of the case

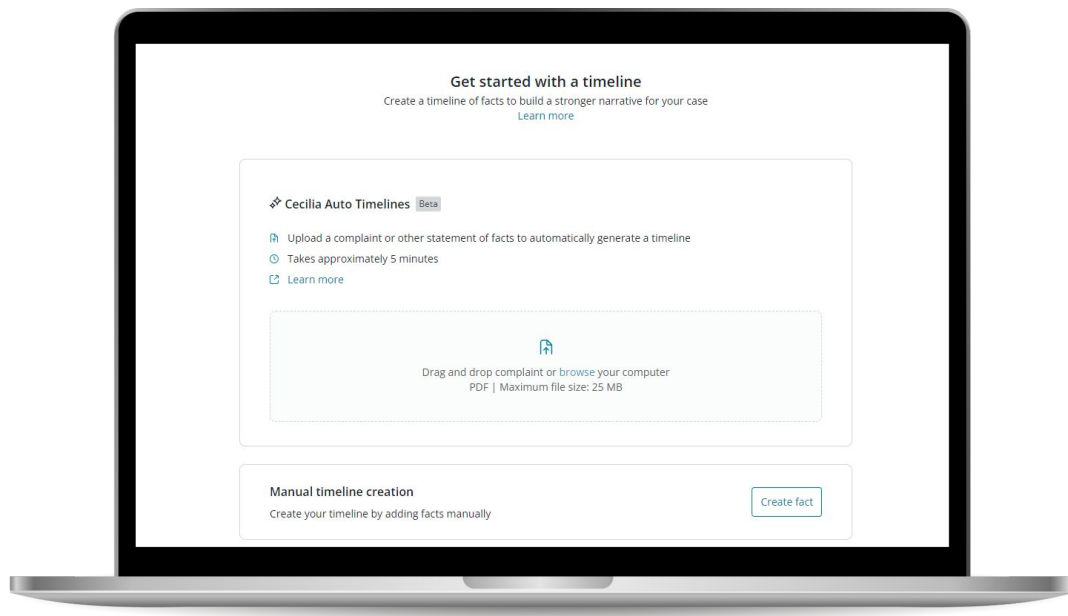

CECILIA AUTO REVIEW

FIRST-PASS REVIEW IN A FRACTION OF THE TIME

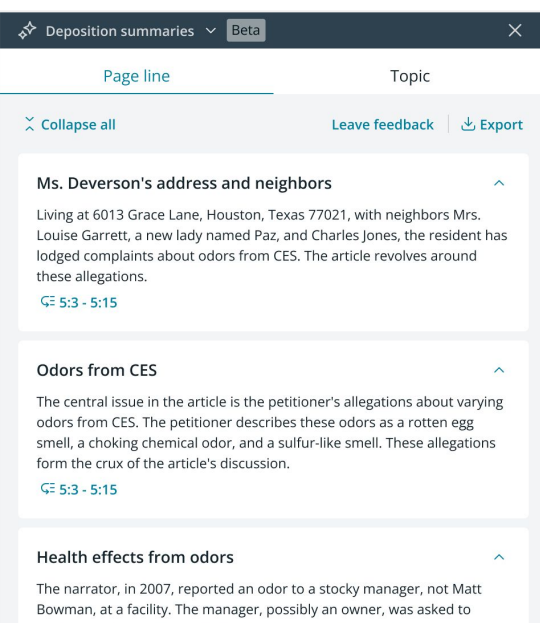

- Use generative AI to review your documents by providing the same sort of instructions you would normally give to a review team
- View a detailed explanation for all AI tagging decisions, including issue tags, on every document
- Skip straight to quality control, rather than coding every single collected document from scratch
- Drastically reduce the time and cost of using human reviewers

CECILIA AUTO TIMELINES

BUILD A STRONGER CASE FASTER

- Upload a case document to automatically generate a timeline with succinctly summarized key facts and the linked, highlighted document from which each fact was pulled
- Continue to add to your timeline as more documents become available over the course of a case
- Use generative AI to provide your case team or client with an organized view of the up-to-date, chronological, relevant information for the case
- Understand and communicate the chronology to assess the strength of the case, prepare for witness examinations, or tell a persuasive story at trial

CECILIA DEPOSITION SUMMARIES

UNDERSTAND AND LEVERAGE TESTIMONY IN MINUTES

- Upload a deposition transcript into DISCO Case Builder to get a digest of key points, with links and citations to the transcript
- Understand testimony fast with deposition summaries organized chronologically or by key topics
- Share slick witness digests with your case team or even with your client shortly after you get a deposition transcript
- Leverage generative AI and avoid incurring hours at risk of write-off by manually summarizing each deposition from scratch

Lawyers are making the most of generative AI to:

JUMPSTART THEORY OF THE CASE

While working on a particularly complex matter, one client uploaded a complaint into Cecilia auto timelines and received dates and summaries, with citations, of the key events alleged by the complaint – without doing any manual work themselves. Seeing the ease, speed, and value of Cecilia auto timelines, along with the integration with DISCO Ediscovery, we’ve had law firm partners ask where Cecilia has been all of their lives.

UNDERSTAND COMPLEX ISSUES

One firm spent weeks looking for evidence demonstrating actual corporate control, but kept coming up empty-handed with traditional search terms. When they got access to Cecilia Q&A, the document that had eluded them for so long was unearthed in hours. Cecilia Q&A understood that “control” could be demonstrated even without that word appearing in the document text. The firm said that Cecilia Q&A unlocks legal issues that are “very hard to prove using conventional search methods.”

PLAY BETTER DEFENSE

In very contentious case, law firms have used Cecilia Q&A on their own outgoing productions. They copy-and-paste each allegation from the complaint into a Cecilia question to identify all of the documents they have to contend with. This allows them to predict and start defending against the plaintiffs’ best arguments.

STREAMLINE FIRST-PASS REVIEW

A team of ediscovery experts at an Am Law 50 firm evaluated Auto Review on a matter and found it particularly helpful in a fast-moving investigative context. A first-pass review that would take over 1,000 hours using the traditional workflow can now take less than 24 hours with Cecilia Auto Review. Senior ediscovery counsel at the Am Law 50 firm found the “recall and precision rates were very satisfactory and defensible.”

“ If we had had Cecilia at the beginning of the case, we would have saved **thousands of dollars and many hours**.

— Associate, Am Law 50 firm

INVESTIGATE DIFFICULT ISSUES

An Am Law 50 firm used Cecilia Q&A on a case involving millions of records. The firm needed to find documents showing misconduct, but the behavior was too generic to be described with search terms. Within the first few questions to Cecilia Q&A, the ediscovery team found an email stating that the problem had occurred and one party knew about it. The team's ediscovery expert said, "We think this document will lead the case team to the pot of gold." According to a senior associate from the Am Law 50 firm, Cecilia Q&A is "awesome".

AMPLIFY THEIR TIME

One Am Law 200 firm relies on Cecilia deposition summaries instead of manual summarization by associates, allowing the firm to digest and incorporate testimony into upcoming depositions, dispositive motions, and overall case strategy more quickly than before. Am Law 200 partners have said that they can get the context they need from a deposition 50-75% faster with Cecilia deposition summaries — and they don't have to wait for an associate to summarize the deposition. Because of the ability to export and share Cecilia-generated deposition summaries with clients without delay, one Am Law 200 partner said: "It's as valuable as a communication tool as it is as a trial practice tool."

TRUSTED SECURITY

DISCO's global technology infrastructure is designed to protect client data. DISCO Ediscovery is SOC2 Type 2 and ISO 27001 certified and complies with the GDPR. The LLMs used by Cecilia AI never train on client data or learn from client usage, and they do not retain client data after being queried and returning a response. LLM vendors meet DISCO's SOC2 Type 2 and ISO 27001 product certifications. We regularly evaluate and update the LLMs used in our products. A current list of the subprocessors DISCO uses, including the LLMs that have passed our rigorous testing standards, is available online at: csdisco.com/subprocessors.
